

VISION

Create trusted support centers where demand and supply come together to boost energy renovation rates in Italy, Romania and Bulgaria:

ONE-STOP-SHOPS FOR HOME RENOVATION SERVICES

The PadovaFIT Expanded project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 847143.

ONE-STOP SHOPS
TO MAKE
HOMES MORE
ENERGY EFFICIENT

EXPANDING
PADOVAFIT!
HOME SOLUTIONS

PADOVA 
Expanded

MISSION

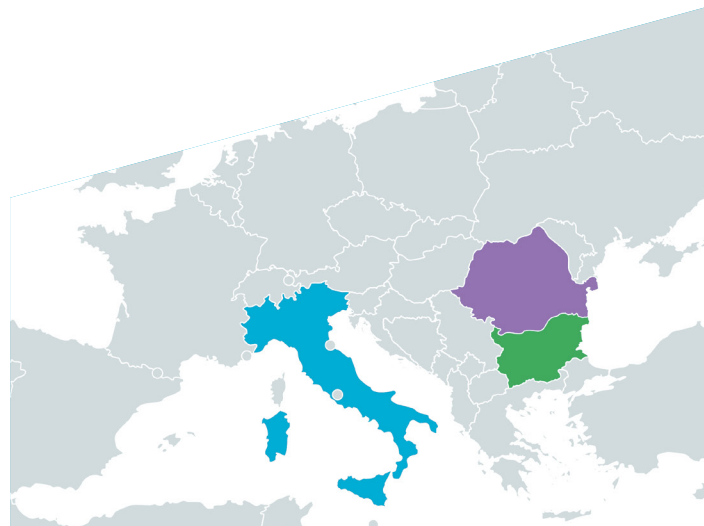

PadovaFIT Expanded aims at creating and piloting a ONE-STOP-SHOP dedicated to home renovation services

Starting from the **City of Padova** (Italy) to expand the concept to the **City of Timisoara** (Romania) and to the **Cities of Smolyan and Vidin** (Bulgaria).

The concept is based on **One-Stop-Shops motivating and supporting homeowners (demand side) as well as stimulating the supply sides**, both technically and financially, to invest in energy efficiency.

GOALS

- identify **enabling conditions & best practices** for financially sustainable, integrated home renovation services based on public and/or private finance
- **increase awareness & trust of homeowners and tenants** towards existing products, services and players on the market
- **improve standardized technical procedures** to reduce costs & increase quality
- improve **financing conditions** for energy renovation investment plans offered by the One Stop Shop
- **develop & implement a one-stop-shop providing home renovation integrated services** to citizens in four pilot areas in three different countries
- **identify solutions to remove barriers** limiting the implementation of effective & sustainable integrated home renovation services
- **increase the capacity of public & private energy market stakeholders** with a specific focus on integrated home renovation services

SCOPE

The project brings together a strong consortium of eight partners coming from four EU Member States.

Starting from the experience gained in the former PadovaFIT project, the **City of Padova** will **set-up and launch a One-Stop-Shop for home energy renovation**.

The project aims at **expanding the business model** to the **City of Timisoara**, benefiting from the work done in Italy and adapting it to the Romanian conditions.

The Energy Agency of Plovdiv supports the **Cities of Vidin & Smolyan** (Bulgaria) to take on the examples of Timisoara and Padova and **prepare an action plan to develop two one-stop-shops** in Bulgaria.
