ONE-STOP SHOPS TO MAKE HOMES MORE ENERGY EFFICIENT

PADOVAFIT EXPANDED AIMS AT CREATING AND PILOTING ONE-STOP- SHOPS DEDICATED TO HOME RENOVATION SERVICES

Starting from the experience gained in the former PadovaFIT project, the City of Padova will set-up and launch a One-Stop-Shop for home energy renovation. The project aims at expanding the business model to the City of Timisoara, benefiting from the work done in Italy and adapting it to the Romanian conditions. The Energy Agency of Plovdiv supports the Cities of Vidin & Smolyan (Bulgaria) to take on the examples of Timisoara and Padova and prepare an action plan to develop two onestop-shops in Bulgaria.
